

## **Incident Action Plan** **Lodgepole Incident**

**ID-SCF-013165, P4HRT7 (0413)**

**DAY SHIFT 0600-2000**

**Monday 7/29/2013**

**NIGHT SHIFT 1800-0800**

**Monday 7/29/13 & Tuesday 7/30/13**

## **Incident Personal Hygiene**

**The following procedures are expected to be followed by all incident personnel.**

- Wash your hands carefully with soap and water, prior to eating and after using toilet.
- Use hand sanitizers throughout the day, viruses left on door handles, hand rails are infectious. This includes steering wheels, radio microphones, staplers, computer key boards, handtools, etc. If people touch it, it can be contaminated.
- Report to Medical Unit immediately if feeling ill.
- Do not enter a portable toilet or bathroom if there is vomit.
- If ill, use only portable toilets or bathroom designated for ill persons.
- Notify Facilities/Safety immediately if there is vomit in any portable toilet or bathroom on incident.
- Do not clean up any vomit unless wearing appropriate PPE.
- Do not handle vomit contaminated clothing or bedding without appropriate PPE. Place in plastic bags for washing.
- Keep at least 6 ft. from other persons if you feel ill.
- If examined by Medical and determined isolation is needed, meals will be delivered and separate sleeping areas established.

***Stay healthy and safe.***

Safety Team: John Haugh, Bob Lattin, Fred Johnson, Reid Hildreth, Cary Brown, Will Worley,  
Dave Provencio, John Langstaff and David Jensen.

## Incident Action Plan Weather Forecast

**FORECAST NO:** 5  
**PREDICTION FOR:** Day/Night **SHIFT**  
**SHIFT DATE:** 7/29/2013  
**TIME AND DATE**  
**FORECAST ISSUED:** 2030 07/28/13

**NAME OF FIRE:** Lodgepole  
**UNIT:** USFS Salmon/Challis NF  
**SIGNED:** Patrick Gilchrist/Todd Barron (t)  
  
**Incident Meteorologist**

**\*\*\*DRY AND WINDY AGAIN TODAY\*\*\***

---

Upper level trough swinging into Northern and Central Idaho will push an area of drier air over the Lodgepole fire. Temperatures are expected to slightly increase with limited cloud development. This will help humidity drop back down into the low teens. Southwest flow will develop and remain breezy during the afternoon hours. Potential for pyrocumulus development during the afternoon, that can act like dry thunderstorms. Dry thunderstorm chances will increase after tomorrow.

---

### **Forecast for Monday July 29, 2013:**

**WEATHER:** Mostly sunny with areas of smoke.  
**TEMPERATURES:** Maximum 76-84 bottom...65-70 top.  
**HUMIDITY:** Minimum 9-14% bottom...16-21% top.  
**WIND (20 foot):** Ridges...west-southwest 18-23 mph with gusts to 40 mph.  
Valleys....downslope/downvalley/downcanyon 5-10 mph through  
1000...then upslope/upvalley/upcanyon 8-12 mph with gusts to 20  
mph...becoming west-southwest and downcanyon 10-15 mph with gusts  
to 25 mph around 1200.  
**Chance of Wetting Rain:** Zero.  
**Lightning Activity Level:** 1 no thunderstorms.  
**Inversion/Haines Index:** Moderate to strong inversion dissipating around 1300. Haines Index 5 moderate.

---

### **Forecast for Monday Night July 28-29, 2013:**

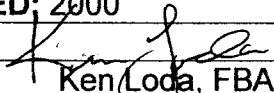

**WEATHER:** Becoming mostly clear with areas of smoke.  
**TEMPERATURES:** Minimum 48-53.  
**HUMIDITY:** Maximum 38-43%.  
**WIND (20 foot):** Ridges...west 15-20 with gusts to 35 mph decreasing to 10-15 mph.  
Valleys...west-southwest and downcanyon 10-15 with gusts to 25  
mph...becoming downslope/downvalley/downcanyon 4-8 mph with gusts  
to 12 mph around 2000.  
**Chance of Wetting Rain:** Zero.  
**Lightning Activity Level:** 1 no thunderstorms.  
**Inversion/Haines Index:** Moderate inversion forming by 2000. Haines Index 4 low.

---

### **Forecast for Tuesday July 29, 2013:**

**WEATHER:** Becoming partly cloudy with areas of smoke with a slight chance of mainly dry thunderstorms.  
**TEMPERATURES:** Maximum 78-85 bottom...65-70 top.  
**HUMIDITY:** Minimum 9-14% bottom...18-23% top.  
**WIND (20 foot):** Ridges...west-southwest 15-20 mph with gusts to 35 mph.  
Valleys....downslope/downvalley/downcanyon 4-8 mph through  
1000...then upslope/upvalley/upcanyon 6-12 mph with gusts to 15  
mph...becoming west-southwest and downcanyon 10-15 with gusts to  
25 mph around 1200.  
**GUSTY ERRATIC WINDS TO 40 MPH WITH THUNDERSTORMS**  
**Chance of Wetting Rain:** 5 percent.  
**Lightning Activity Level:** 1 then 2 in the afternoon.  
**Inversion/Haines Index:** Moderate inversion dissipating around 1100. Haines Index 5 moderate.

**FIRE BEHAVIOR FORECAST**

<b>FORECAST NUMBER</b> 8	<b>TYPE OF INCIDENT:</b> Wildland Fire
<b>INCIDENT NAME:</b> Lodgepole	<b>OPERATIONAL PERIOD</b> Day & night, 7/29/13
<b>DATE ISSUED:</b> 28 July 2013	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> Salmon-Challis NF	<b>SIGNED</b>  Ken Loda, FBAN

**INPUTS**

**WEATHER SUMMARY** See the preceding Fire Weather Forecast.

**FUELS CONDITIONS** Fuel moisture: One-hour fuel moisture can be expected to be about 11% at 0700. That will drop to about 2% from about 1000 to 1700. The 10-hour fuels are at 4%, and 100-hour fuels are about 5%, and the 1000-hours are about 8%. After 2000 the fuel moistures will slowly add 7% through the night. Live fuel moisture: The live fuel moisture is around 117 – 160% in conifers, about 94% – 125% in the shrubs. However, this varies with elevation, aspect, and setting.

**OUTPUTS**

**GENERAL FIRE BEHAVIOR** The heavier fuels (100- and 1000-hours) are little influenced by changes in relative humidity, and in their present condition continue to burn to some extent through the night. When winds align with slopes expect overall behavior to become extreme. General atmospheric instability (Haines index) is an indicator of potential for large fire growth, and the daytime Haines index is 5 – moderate, nighttime is 4 – low.

**Day Shift:**

Fuel Model	ROS (ch/hr)		Flame Length (ft)		PIG	Spot_Dist
	Head (Mid/Max)	Backing	Head(Mid/Max)	Backing		
High Load Dry Climate Shrub understory	13/20	1	9/11	3	90%	.3-.4 mile
Grass/Brush	21/39	1	4/6	2	90%	.2 mile

Fire behavior predictions are for the hottest and driest period of the day with mid-range and maximum winds.

**Night Shift:**

Fuel Model	ROS (ch/hr)		Flame Length (ft)		PIG	Spot_Dist
	Head (Mid/Max)	Backing	Head(Mid/Max)	Backing		
High Load Dry Climate Shrub understory	8/15	1	7/9	1	30%	.2-.4 mile
Grass/Brush	5/7	1	2/2	1	30%	.1 mile

**SPECIFIC FIRE BEHAVIOR**

**Spotting:** Rollout, torching and spotting is likely throughout the day.

**Crown fire potential:** Short crown runs are possible, particularly when the slope aligns with winds, or in the forecast gusts. Rates of spread of a crown fire would be up to 156 chains per hour in the gusts.

**SAFETY**

**SAFETY** Today we will meet or exceed three out of four local thresholds for extreme fire behavior – relative humidity, winds, and 1000-hour fuel moisture.

**AIR OPERATIONS** Once again, gusty and erratic winds may inhibit effective air operations in the afternoon.

IRAWS talk! Rx/Tx 163.350. While transmitting, key in 0008 for Challis Creek; 0009 for Jeff's Flat; 0012 for Pine Summit; or 0034 for Twin Peaks.

Incident Location Idaho				County	State ID	Latitude	N	Longitude	W		

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

## Resource Advisor's Message - July 29, 2013

# Needles of Five...Leave it Alive!

### Whitebark Pine – A Living Legacy

If you have spent much time in the high country of the Central Idaho, you have probably noticed the windblown ancient appearance of the White Bark Pine (WBP). Perhaps you marveled at how these trees survive along bare, harsh, and windswept ridgelines.

But maybe you didn't know that the species is considered to be of vital importance to the high elevation ecosystems of the Northern Rocky Mountains and Pacific Northwest:

- They act as snow fences to hold moisture later in the spring gradually releasing water into the stream systems.
- They are an important food source for wildlife including black bear and the Clark's nutcracker.

This tree is in danger of functional extinction due to the introduced white pine blister rust along with bark beetle attacks. WBP depends on fire to create openings for regeneration. The Clark's nutcracker, a native bird species, prefers these openings to cache the heavy seeds of the WBP. Lost and abandoned caches become the future WBP forest. Thus fire exclusion has also played a role in the tree's demise.

These trees can easily be damaged when we fight fire because they often grow in the same locations we cut fireline and helispots. It is very important that we do our best to protect the remaining WBP. These survivors may contain genetic resistance to the rust that could be critical to the long-term survival of this species.

### What Can I Do?

- Remember, safety and fire containment are always the top priority.
- Learn to identify this species and it's range - teach others.
- Avoid cutting WBP whenever possible.
  - fireline construction
  - helispot construction
- In our area, cutting many of another species is better than cutting a few WBP.
- Become a WBP advocate and learn more about this important tree!

### Identification

- Crown is broadly branched and open.
- Thin gray bark

- 5 needles per fascicle
- Needles clustered at branch end
- WBP can easily be confused with lodgepole pine, which has similar bark, but only 2 needles per fascicle.

*Jennifer Ranne*  
READ

Did you know? The Clark's nutcracker is in the same family as the crow, raven, and magpie. It can carry up to 30 whitebark pine seeds at one time and may travel 10 miles from a seed harvest site to a seed cache site.

## Human Resource Message

*Thought for the Day*

Correct Biased Communication Patterns  
Working in emergency incident

situations is no simple task. Easily we can offend someone by a careless slip of the tongue, pen, or through inappropriate behavior. With increased diversity there comes a need for increased sensitivity about how we interact with one another. Becoming more sensitive in our dealings with one another results in increased rapport with those whom we work and contributes to a positive, productive and safe work environment.

*Marty Adell*

Incident Commander

*Florence Navarro*

*David Hollins (7)*

Human Resource Specialists

## Training Specialist Message

Please stop by and see me for a chance to review your taskbook and document your training on the incident.

This will be short and sweet... promise!

Thanks,  
Linda Guy, TNSP

### LOGISTIC INFORMATION

- Please GPS all pumps. Info needed: Pump # (Example: GBK-870-0814), GPS and Location. Please provide info to Situations.
- RADIO ORDERS FOR HOT CANS TO COMMO BY 1100 HRS.

**\*\*\* PLEASE DO NOT CAMP AT THE PARK. CAMP ONLY AT THE BASEBALL FIELD OR RODEO GROUNDS.**

**\*\*\* WE ARE RECYCLING EVERYTHING!!! PLEASE PLACE ITEMS IN THE PROPER CONTAINERS.**

### Hours

**FUEL – 0600-2200**

Go to Ground Support get an emergency fuel issue ticket. LOCATED AT THE SINCLAIR NEXT TO NAPA

**Food Service:** Breakfast 0500-0830  
Lunch Pick up at Refer near supply.  
Dinner 1730-2200

**Shower Hours:** 0500-1200 hrs/1400-2200 hrs

**Supply Hours:** 0600-2100

### GROUND SUPPORT LOCATED AT RODEO GROUNDS

Weed Wash Station, Mobile Mechanic, Equipment Inspection, Staging Area, Heavy Vehicle Parking and Day/Night Sleeping.

FIRE INFORMATION  
LODGEPOLE FIRE  
JULY 2013

Team Adell's Public Information Officers are providing information about the Lodgepole Fire by many means including daily information traplines, bulletin boards, public meetings, individual personal contacts, and various social media sites, including:

- Facebook: Great Basin IMT 7 Adell
- Gmail: Great Basin Team [Adell@gmail.com](mailto:Adell@gmail.com)
- Twitter: Great Basin Team Adell
- IMT Center: [www.IMTCenter.net](http://www.IMTCenter.net)

*To provide support to the firefighters and incident team, PIOs also update camp bulletin boards, provide a lost and found location, and personal mail delivery. Stop by our information center at ICP (just inside the entrance to the community center) if we can help in any other way!*

Lodgepole Fire Information: 208-879-1249

## Overview

---

Norovirus is a very contagious virus. You can get norovirus from an infected person, contaminated food or water, or by touching contaminated surfaces. The virus causes your stomach or intestines or both to get inflamed (acute gastroenteritis). This leads you to have stomach pain, nausea, and diarrhea and to throw up.

Anyone can be infected with norovirus and get sick. Also, you can have norovirus illness many times in your life. Norovirus illness can be serious, especially for young children and older adults.

Norovirus is the most common cause of acute gastroenteritis in the United States. Each year, it causes about 21 million illnesses and contributes to about 70,000 hospitalizations and 800 deaths. Norovirus is also the most common cause of foodborne-disease outbreaks in the United States.

The best way to help prevent norovirus is to practice proper hand washing and general cleanliness.

### Learn more about norovirus

- [Symptoms \(/norovirus/about/symptoms.html\)](/norovirus/about/symptoms.html)
- [Transmission \(/norovirus/about/transmission.html\)](/norovirus/about/transmission.html)
- [Prevention \(/norovirus/preventing-infection.html\)](/norovirus/preventing-infection.html)

### Related Pages

- [CDC Feature: Prevent the Spread of Norovirus \(http://www.cdc.gov/Features/Norovirus/\)](http://www.cdc.gov/Features/Norovirus/)

### Norovirus Has Many Names

You may hear norovirus illness called "food poisoning" or "stomach flu." Food poisoning can be caused by noroviruses. But, other germs and chemicals can also cause food poisoning.

Norovirus illness is not related to the flu (influenza), which is a respiratory illness caused by influenza virus.

#### 8. Medical Emergency Procedures

- Declare the nature of the emergency. Medical injury/illness (is it life threatening?)
- If Life threatening (**Medevac**), then request the frequency be cleared for emergency traffic.
- Identify the on-scene point of contact (POC) by Resource and Last name (i.e. POC is TFLD Smith)
- Identify nature of incident, # injured, patient assessment(s), and location (geographic and GPS coordinates)
- Identify on-scene personnel by position and name (i.e. EMT Jones)
- Identify preferred method of patient transport
- Request any additional resources and/or equipment needed
- Document all information received and transmitted on radio or phone
- Identify any changes in the on-scene point of contact or medical personnel as they occur
